RESILIAGE

Revolutionising
community resilience

BUILDING SUSTAINABLE RESILIENT COMMUNITIES WITH LOCAL HERITAGE DRIVERS

www.resiliage.eu

WHAT IS RESILIAGE'S GOAL?

Funded by the Horizon Europe programme RESILIAGE's mission is to provide novel knowledge and impactful solutions for exploiting community resilience and **co-building a risk-aware and disaster prepared sustainable development.**

The project will enable a step-change in **Disaster Risk Management** through **bottom-up processes** that involve citizens, first responders and local decision-makers in the co-creation of **digital tools, soft solutions** and **preparedness plans.**

HOW WILL THE PROJECT ACT?

By co-developing the **Resource Ecosystem for Community Resilience**, an open platform that provides free and oriented access to knowledge, tools, resources and peer exchanges aimed at improving information and supporting citizens in dealing with natural disasters and climate change adaptation.

BUILDING RESILIENCE

- **Map crisis preparedness** in 5 Community Resilience locations.
- **Identify human factors** critical in crisis response, risk perception, risk communication & cooperation for.
- Investigate the **interrelation of societal and cultural factors** in experimental simulation studies.
- Bottom-up approach to **co-shape and co-develop digital tools and soft solutions** with target groups for a community better prepared to recover in post-disaster traumas.
- Explore how societal and cultural factors **play a part in helping analyse the role of mis/disinformation.**

THROUGH HERITAGE DRIVERS

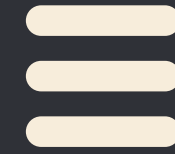

- Cultural heritage is a **driver for co-creating solutions** against disasters.
- **Direct contact point** with the communities.
- Foster **collective memory** as a cohesive element of the identity of communities.
- Reinforce a **sense of place and belonging.**
- An active resource that enables communities to **go beyond the disaster event.**
- Represent **cultural practice essential** for societal well-being.
- Include **cultural exchanges**, inclusive activities and public spaces.
- Is the result of an **aware and multilayered people-environment interactions.**

WHERE?

RESILIAGE implements a community-centred approach to develop local-based analysis about risk perceptions and protective behaviour in 5 real communities (CORE Labs).

TARGET GROUPS

First responders

- Firefighters
- Law enforcement officers
- Paramedics
- Emergency medical technicians

Knowledge organisations

- Academia
- Research organisations
- Educational centres
- Training centres

Policy makers

- International organisations
- Governing bodies and institutions
- EU agencies
- Local, regional or national authorities
- Administrators

Citizens and civil society

- Volunteers
- Communities
- Civil society organisations
- Associations
- NGO
