DESCRIPTION

The Summer School has a motto, **gendered approaches and digital skills in heritage expertise for community resilience**.

It aims to **Empower Women in Disaster Risk Reduction through Heritage**, by exploring **cultural natural heritage** drivers for enhancing adaptation and preparedness with an emphasis on natural disaster and climate change related risks.

The participants will be engaged in real case scenarios and testimonies, experiencing customised digital tools, immersed in interactive learning experiences, both for **empowering women with skills** in a mainly traditional male domain and for building a new perspective of knowledge framework in the field.

The main objective will be to improve how to play a **leading role in Heritage and Risks for building more resilient communities** by fully capitalising on the capabilities of women.
