

## JOIN US IN OUR MISSION TO BUILD SUSTAINABLE RESILIENT COMMUNITIES WITH LOCAL HERITAGE DRIVERS

Funded by the Horizon Europe programme, RESILIAGE will enable a step-change in Disaster Risk Management through bottom-up processes that involve citizens, first responders and local decision-makers in the co-creation of digital tools, soft solutions and preparedness plans.

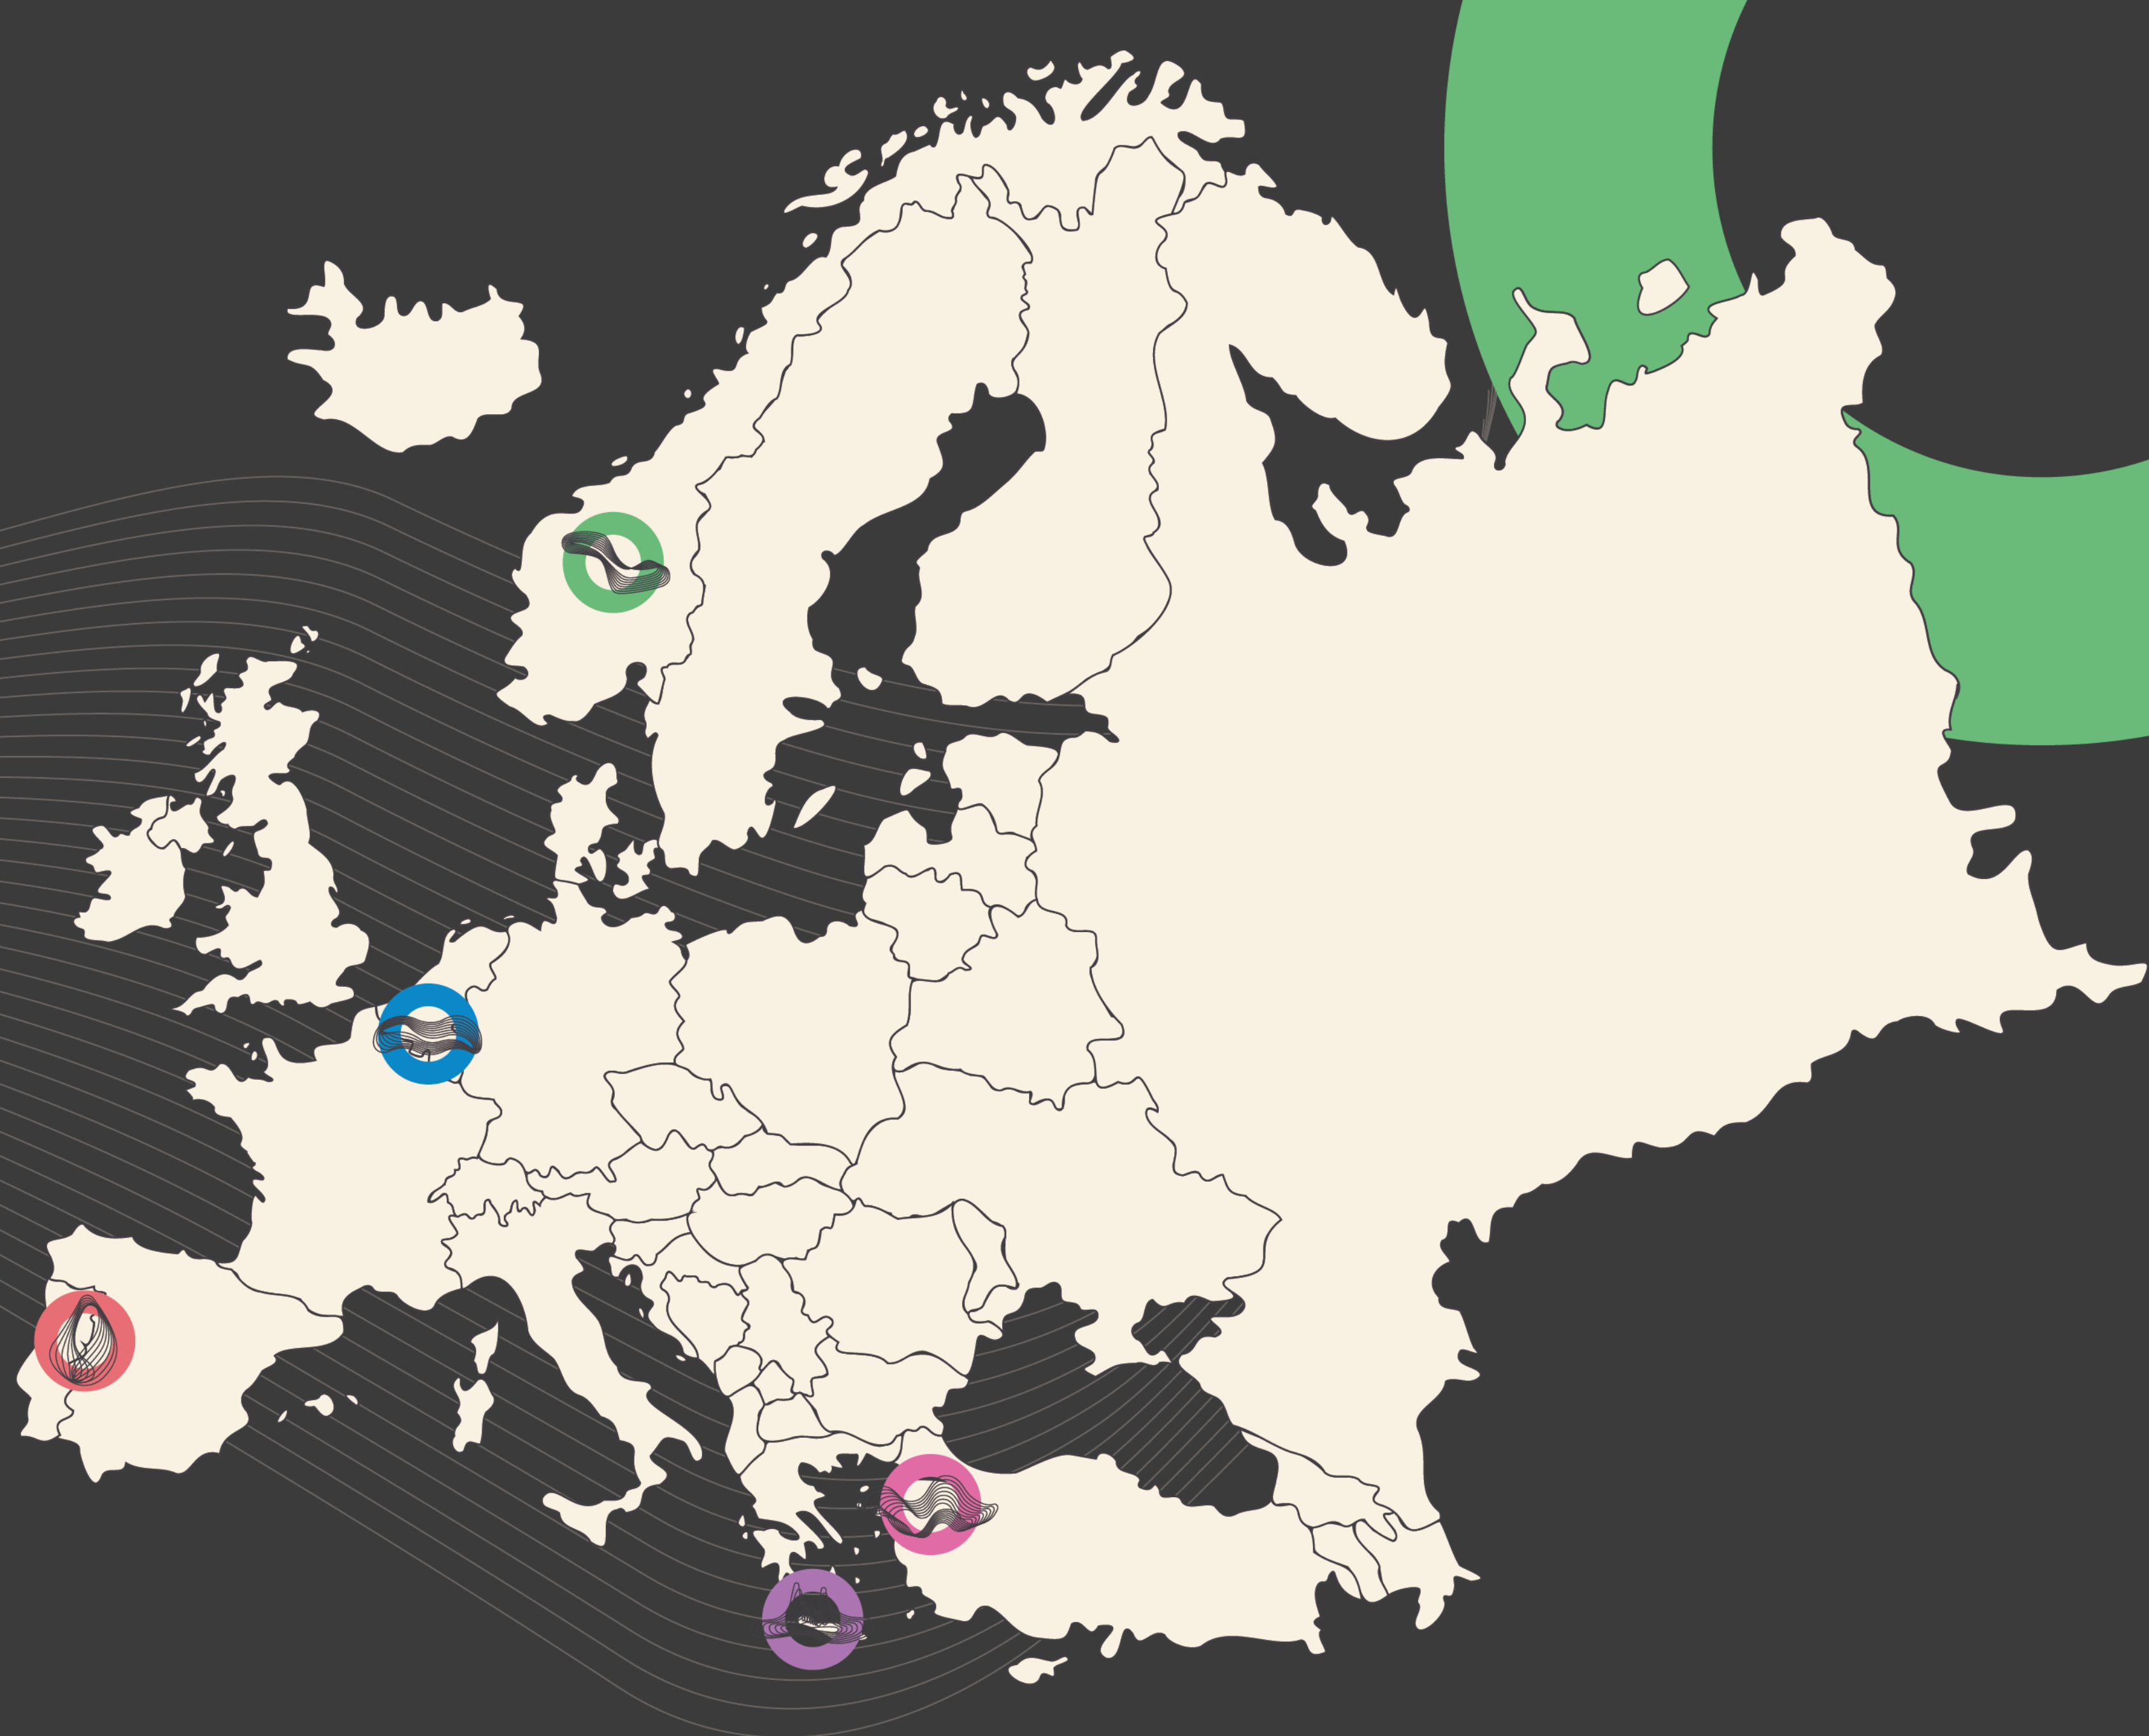

### HOW?

Via a systemic approach, heritage drivers and bottom-up processes with co-created digital tools and soft solution, the project will:

- Map crisis preparedness** in 5 Community Resilience locations;
- Identify human factors** critical in crisis response, risk perception, risk communication & cooperation for;
- Investigate interrelation of societal and cultural factors**, in experimental simulation studies;
- Co-shape and co-develop** digital tools and soft solutions with the communities;
- Develop and test digital and non-digital tools**, methods and solutions for a community better prepared to recover from post-disaster traumas.
